A Place To Call Home

Free senior placement service locates assisted living options

There is a new way to receive hands-on guidance to locate quality assisted living options throughout Nassau and Suffolk counties and northeast Queens. Assisted Living Locators has a new Long Island franchise. Based in Arizona, Assisted Living Locators offers a no cost, nationwide senior care placement and referral service for in-home companion care, independent retirement options, assisted living, memory care and skilled nursing facilities. The company has more than 100 franchisees in 34 states and the District of Columbia.

According to the Administration on Aging, the population of adults 65 and older is experiencing the biggest increase in history. Between 2010 and 2050, the number of seniors is expected to more than double.

"As a result of the growing senior population, many different options for care and housing are available, including in-home companion care,

55+ communities, independent retirement options, assisted living, memory care and nursing homes," said Mike McClernon, Assisted Living Locators franchise owner. "We are also an excellent resource for short-term respite care, emergency discharges, out-of-town relocations and coordinating non-emergency transportation. Seniors and their families need a trusted advisor to

help them navigate what can be an overwhelming amount of information. Assisted Living Locators offers a complete assessment of a senior's needs and recommends a plan that provides the full continuum of care."

He explained that Assisted Living Locators offers a complete assessment of a senior's needs and recommends a plan that provides the full continuum of care.

"My goal is to come alongside families and seniors to provide free, personalized assistance in locating assisted living, memory care options or in-home care to best fit the needs of the senior," said McClernon. "And because I'm local, I look at a wide range of options for seniors that just can't be matched by online resource databases. I tour and rank all the facilities I recommend, and make sure all our partners in the senior care market are fully committed to providing the best care possible."

"I'm passionate about helping others and excited about assisting families navigate the system to find the best senior care for their loved ones," he added.

For more information about Assisted Living Locators no cost community service for seniors and their families, call Mike McClernon at 516-254-9481 or visit, www.assistedlivinglocators.com/long-island.
